

enzie economy ROOF SPACE LADDERS

For anyone seeking a budget priced timber ladder, the Economy ladder is a 2-3 hour do-it-yourself project. It not only saves you money, but also allows you to gain access to that unused roof space or garage roof area. You won't have to bother with that shaky step ladder again. The Economy ladder is strong, durable and safe to use.

SAFE:

Plenty of toe room between the treads and the hatch make this a very safe ladder. The 360mm x 85mm timber treads are a comfortable 240mm apart.

VERSATILE:

The Economy ladder can be set at any height within the ceiling. This allows for the application of a variety of lining materials to the hatch to match your ceiling, i.e. lining board.

EASY TO INSTALL:

Your **enzie** roof space ladder comes fully assembled with built in installation clips for one man installation.

EASY TO USE:

The unique spring balancing mechanism allows you to operate your ladder without fear of it snapping shut into the ceiling or falling down. Your ladder is reached with a steel rod. It then locks into place and is easily unfolded.

Model No.	Ceiling Height	Opening Size.	Insulation	Assembly	Weight	Package Size
mecco	<2750 mm	540 x 1130	30 mm polystyrene 1.12 Insulation Factor	Supplied Fully Assembled	24 KG	1200 x 620 x 400
